Proof of Submission

UPAR Challenge 2027, Track 1: Pedestrian Attribute Recognition
Computer Vision Assignment 2, Fall 2026, FAST-NUCES Karachi

Ibrahim Johar Farooqi (23K-0074) Syed Ukkashah Ahmed (23K-0055)

Codabench username: `ibrahimjohar`
Final submission: ID 1005773 (`sub08_ens_clip_dinov2_int8_shift050.zip`), submitted 2026-10-20 20:41
Score: 0.7833 (mA 0.7873, instance F1 0.7794), rank 35 on the leaderboard on 20 October 2026
Code: `https://github.com/ibrahimjohar/upar27-challenge-pedestrian-attributes`

We made the final submission on 20 October 2026 (time as shown by Codabench) and took the two leaderboard screenshots the same day, a few hours later. The submissions list was captured on 22 October 2026. Other teams could keep submitting until the phase closed on 21 October 2026 (Anywhere on Earth), so rank 35 is our rank on 20 October and may have changed by the close. The organisers will also verify each team's code before publishing the final ranking.

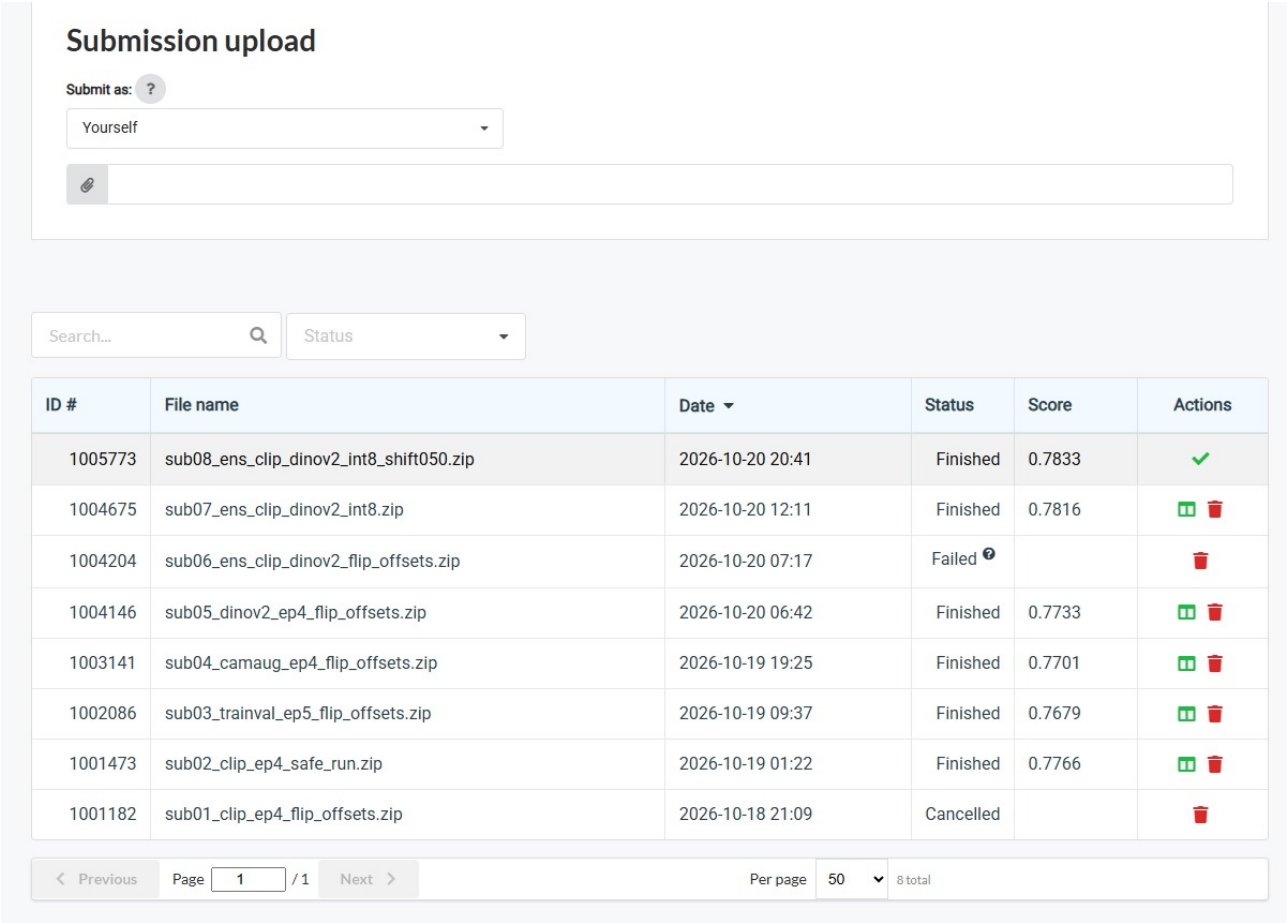

Figure 1: All eight submissions on Codabench (screenshot taken on 22 October 2026). Submission 1005773 finished with a score of 0.7833. The green tick marks it as our leaderboard entry.
